Stage 1
Replication
15 UCI datasets,
raw features,
KNN vs NCN
(k = 5)
Stage 2
Scaling test
same folds,
StandardScaler
fit on train fold
Stage 3
Mechanism
heterogeneity
index, synthetic
scale sweep,
k sweep
Stage 4
Structure
skewness and
separability,
NC as a global
reference
Stage 5
Guidance
evidence-graded
selection rules
